The Victims of Pan Am Flight 103 organization is dedicated to and strives for passenger planes to be as secure as possible. Our goal is to have 100% physical screening of passengers, crew, luggage and cargo. Trading lives for dollars is totally unacceptable to the families who have paid the price of ineffective security.

All cargo on passenger planes should be regarded as "Unknown", and treated to the same level of physical inspection as the passengers and their luggage. The USA Cargo Act (Universal Screening of Air Cargo Act), HR2455, could achieve our goal.

The proposed TSA "Known Shipper" program will marginally increase security, but will not provide the real security passengers expect and deserve. To support our goal of 100% physical screening of cargo we urge support for U.S. Rep. Ed Markey's amendment to the Homeland Security Appropriations Bill. This would prevent TSA from spending funds for security that does not include full screening of cargo on passenger planes.

Your support is needed so that proven technology can be applied to provide the best possible security for the flying public.
